

Press release

## **IBC SOLAR– The Expert for storage and off-grid present again on the Solar Show Africa**

After their first appearance in 2018, IBC SOLAR will be present again in 2019 with their own stand at the Solar Show Africa from 26 – 27th March in the Sandton Convention Centre in Johannesburg.

IBC SOLAR opened its doors in Cape Town in 2017 providing the Sub-Saharan side of the continent with their solar products and systems. “Africa is an attractive solar market with rapid growth and high demand for self-consumption systems with energy storage solutions” says Daniel Haitzler, the Managing Director of the subsidiary in Cape Town. “Our business activities focus on commercial and residential systems up to 5 MW. We provide EPC companies and installers not only with solar products but solutions having our own design software PV Manager for instance” he refers.

Since the end of last year, IBC SOLAR also carries Victron products in the portfolio. Alex Joist, Business Development Manager adds: “This complements the SMA inverter portfolio and the company’s position as “The Expert for storage and off-grid solutions”. The flexible combination of IBC and GCL modules with our inverter portfolio, the handy IBC mounting and the BMZ storage solutions makes it possible to provide our clients with bespoke PV systems for their applications.”

Get Empowered by the Sun and visit IBC SOLAR at the Sandton Convention Centre, Level 2, Stand B15.

### **About IBC SOLAR**

IBC SOLAR is a leading global provider of photovoltaic and energy storage solutions and services. The company offers complete systems and covers the entire product range from planning to the turnkey handover of photovoltaic systems. The product range comprises solar parks, self-consumption systems for commercial enterprises and private households, off-grid photovoltaic systems and diesel hybrid solutions. As a project developer and general contractor, IBC SOLAR implements and markets major solar projects worldwide. The manufacturer-independent system house guarantees the highest quality for all projects and has currently implemented photovoltaic systems with an output of over 3 gigawatts worldwide. IBC SOLAR works with a close network of Premium Partners and supports them with their own software tools for planning and designing grid-connected systems including storage systems. IBC SOLAR offers customised packages for energy providers, municipal utilities and providers of photovoltaic solutions. The company ensure the best possible output of solar parks through technical management and monitoring.

IBC SOLAR was founded by Udo Möhrstedt in Bad Staffelstein in 1982 who has managed the company as the Chairman of the Executive Board to date. The system house is a pioneer of the energy turnaround in Germany and is especially committed to energy cooperatives with its own planned public solar parks. The company is active internationally with numerous regional companies, sales offices and partner companies in more than 30 countries.
